

## We Are Honored to Stand By Your Side.

As a mission-aligned insurer of YMCAs, our model is simple. We learn exactly how people may get hurt at the Y, then we develop practical tools to help you keep them safe:

- **Direct access to an expert team:** You'll have direct access to a specialist team that deeply understands the needs of the Y.
- **We are available 24/7:** When a crisis hits, we are there by your side—including, where necessary, flying someone out to be there in person and help your community heal.
- **YMCA-focused resources and events:** We take lessons from our claims and turn them into resources, online events and recommendations specifically designed for YMCAs like yours.

Since 1997, we've done incredible things together with you, the YMCA movement. We've helped you transition out of unsafe vans. We've transformed aquatic safety practices together. And we've supported you as you prioritize abuse prevention. None of it has been easy, but it has all been worthwhile.

“When our Y had a significant incident, Redwoods provided the tools that were needed to fight through a tough situation. Every step of the way, there was a person who was advising me, standing beside me, assisting with how to move forward—from caring for our staff, to establishing the needs for the particular facility.”

—**Dale Brunner**, CEO, YMCA of Greater Dayton

“My experience with Redwoods from Day One was about relationship. We talked about what the expectation would be if something bad happened. We talked about how important it is to say ‘I am sorry’ to the family of a victim, and to follow values that I identify with. It was really obvious to me that Redwoods wanted to get to know us.”

—**Jared Lehman**, CEO, Lima Family YMCA
