

# We Have Your Back.

Whether it's the COVID pandemic and its aftermath, expanded statutes of limitation around abuse, or the growing threat of wildfires and hurricanes, camps are facing challenges on multiple fronts. We use insurance to help you navigate these challenges. Our model is simple. We learn exactly how campers are harmed, then we develop practical tools to keep them safe:

- **Direct access to an expert team:** You'll have direct access to a dedicated, safety-focused team that speaks your language.
- **We are available 24/7:** When a crisis hits, we are there by your side—including, where necessary, flying someone out to be there in person and help your community heal.
- **Free, unlimited online trainings:** Our online training platform features nearly 100 courses, many of which were custom made for camps.
- **Communicable Disease Coverage:** The COVID-19 outbreak has revealed how disruptive disease outbreaks can be. That's why we do not exclude communicable diseases from our GL coverage.

“Mentoring is a core part of the work we do. We've really appreciated Redwoods' willingness to support that work—both in terms of the insurance coverage, and also in terms of sharing their deep experience, knowledge, and research on best practices to make sure we stay safe.”

—**Jim Nute**, Executive Director, The Mayhew Program
