

We Are Here. For Good.

Since 1997, Redwoods has been working with Ys to prevent threats like child sexual abuse and drownings. We are now the largest insurer of YMCAs in the country. And even in a difficult insurance environment, we are not going anywhere.

Our model is simple. We learn exactly how people are harmed at YMCAs, then we develop practical tools to keep them safe:

- **Direct access to an expert team:** You'll have direct access to a dedicated, safety-focused team that speaks your language.
- **We are available 24/7:** When a crisis hits, we are there by your side—including, where necessary, flying someone out to be there in person and help your community heal.
- **Free, YMCA-focused resources:** From webinars to online trainings, we take lessons from our claims and turn them into resources specifically designed for YMCAs and other youth-serving organizations.
- **Communicable Disease Coverage:** The COVID-19 outbreak has revealed how disruptive disease outbreaks can be. That's why we do not exclude communicable diseases from our GL coverage.

“Thank you so much for the virtual visit last week. I know I speak for all of us when I say how incredibly helpful it was. Just listening to our leaders during the calls helped me understand more about the gaps we currently have and also gives them a chance to talk about their operations.”

—**Elissa James**, VP of Risk Management, YMCA of Central Ohio
